

DISPLAY REPLACEMENT PROGRAM

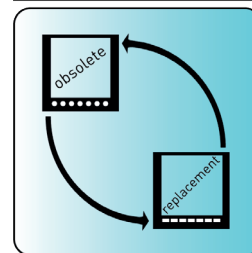

Is your fleet facing obsolete displays?

THOMMEN specializes in offering customized aftermarket display solutions. We can provide tailored replacements for legacy CRT or LCD cockpit and mission displays which are no longer supported or serviceable.

With our brand-new ISO class 5 certified cleanroom we can offer in-house lamination and assembly services in a fully controlled and clean environment with aerospace standards. We can also cut LCD displays to customized sizes for specific applications.

THOMMEN Display retrofit program

With decades of experience in the complex manufacturing processes of high-precision flight instruments, we apply particular care in designing and supplying the best-in-class quality and reliability.

Our display replacement program can cover a multitude of applications for fixed and rotary wing aircraft and is your custom-designed solution to solve your painful obsolescence issues that harm your mission readiness and fleet availability.
